ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

COUNTY: GLENN

DIVERSION

WITHIN: 1/4 OF W1/4 SECTION 21, T21N, R02W, MDB&M.

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1991. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons  
☐ Acre-feet  
☐ \_\_\_\_\_ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1988	No stream flow due to drought												
1989	No stream flow due to drought												
1990	No stream flow due to drought												

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 80 acres alfalfa  
Stockwatering No stream 500 head sheep  
Domestic due to drought  
Other (specify) \_\_\_\_\_

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

None

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

DATED: 3/16/91, 19\_\_\_\_, at Orland, California

Signature: Mrs. N. Goecken

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

S2846

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water John Canadas  
Address Road 30, Orland, California
- B. Name of body of water at point of diversion Small, unnamed stream  
Tributary to Sacramento River
- C. Place of diversion Portion of N 1/4 Section 21, Township 21 N, Range R2W Mt. Diablo  
Glenn County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.
- D. Name of works \_\_\_\_\_
- E. Capacity of diversion works Return water system capturing overflow & other water cubic feet per second  
gallons per minute  
Capacity of storage reservoir 1.8 acre feet gallons  
acre-feet  
State quantity of water used each month in gallons or acre-feet  

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
:	:	:	:	x	x	x	x	x	x	:	:	:	:

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. alfalfa, barley, wheat, sorghum - 80 acres total, and stock water

Maximum annual water use in recent years not established gallons  
acre-feet  
Minimum annual water use in recent years " " gallons  
acre-feet  
Type of diversion facility: gravity x, pump x  
Method of measurement: weir \_\_\_\_\_, flume \_\_\_\_\_, electric power meter \_\_\_\_\_, water meter \_\_\_\_\_, estimate x

F. Purpose of use (what water is being used for) Field & row drops and stock water

G. General description or location of place of use (use sketch of section grid on reverse side if you desire) See back

H. Year of first use as nearly as known unknown

I. Name of person filing statement Ned V. Goacken  
Position Owner Organization \_\_\_\_\_  
Address 5589 Silverado Trail, Napa, California

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
